Equipment experience	Tractor(good)
6.Hobbies and interests	Hunting, fishing, travelling, football, volleyball, spending time with my wife, family and my hunting dogs
7.Job start date	As soon as possible

Autobiography

My name is Oleh. I'm 30 years old. I was born in 1988 in Poltava. I have a small friendly family which consists of father. His name is Serhii. He is 61 years old, he's the owner a small company which produces food equipment. My mother's name is Halyna. She is 61 years old, she works at local school as a teacher of Ukrainian language and literature. The elder brother is Ihor is 38years old, he works as a lead standardization and quality engineer in a biscuits factory Invent LLC. I'm married to Olena Bukhtoiarova 27 years old, she has her own business.

I spent my childhood in the village where I finished the local school in 2006. Since my childhood I've been connected to country style of life, because my parents had their own home organic farm, they bred animals (pigs, rabbits, hens, ducks) also we grew different vegetables and fruit.

From 2007 to 2010 I studied in Poltava collage of Food Technology, where I got diploma in Repair and Maintenance of Food Technology. After the collage I worked for a firm «Poltava- SouzMash», where I was a locksmith. We produced different food equipment like milk tanks, conveyers, cheese making machinery, butter making machinery and other food equipment, where I got good skills of working with drawing, repairing and produce engineering.

I got my first practice working with pigs in Agricultural limited liability company «Maxi-2010», specializing on pig breeding, I worked as an operator of pig-complex. It was summer job during the time when my firm had a pause at work. I liked to work with animals and decided to get one more education.

I entered Agrarian Lyceum, the faculty of veterinary where I studied from 2012 to 2014. After the graduation I went abroad for an intership.

I worked as an assistant at Saerslevgaard farm from December 2014 to July 2016 in Denmark. I worked with piglets (6-30kg) in a klima stable full technological cycle: cared for piglets, my job included feeding, treatment, vaccination and repairs in the stables.

I also worked with slaughter pigs (30-120 kg) on full technological cycle. Additional skills were driving a tractor and loader, I have some practical experience in a feed barn, also I can do repairs. During practice in this farm we increased our production on of selling pigs from 12000 to 14000 pigs per year.

After my students contract was finished I became an employee for Bosebjerg Farming from October.2016 to February 2017 in Denmark. I worked with 1050 sows; 640 sows farm; 56000 piglets per year; 5000 slaughter pigs per year. I did the same job as I mentioned above.

From March 2017 to February 2018 I worked at Kongstal Multisite A/S in Denmark. I worked with export piglets (6-30 kg) on full technological cycle with such duties as caring for piglets, treatment, vaccination, repairs, washing and disinfection stables as well.

Also I have experience working in faring stables with such duties as caring of sows, feeding, treatment, vaccination, repairs, washing stables, castration of piglets, polishing teeth.

At the same time I worked at insemination stable and worked with pregnant sows. Also I worked with tractor and loaders, I moved animals from a farm to a farm, moved food from the feeding barn to the farms and during the harvest period I worked on the fields. I've got some experience working with wild animals. I helped at hunting grounds, feeding, caring for wild animals and organizing hunting.

I'm really an active person, my favorite hobbies are hunting, fishing and travelling. I try to spend all my free time outside, because I'm keen on the nature and animal world. I try to be multi-faceted person. Besides I like active sports like football, volleyball, hockey and of course I love spending time with my wife, family and my hunting dogs at home.

My goal is to work in Canada as I want to get new experiences and skills, I want to see new technologies, innovative equipment because Canada is a developed country in that way. I want to discover that country from inside as well. I'd love to make new friends and improve my English.

Regards,

Oleh
