Other language(s)	English - Good, Russian - Perfect
Driver licence	Car, Tractor
Equipment experience	Tractor(high)
6.Hobbies and interests	Cars, self-development, travelling
7.Job start date	As soon as possible

Autobiography

My name is Oleksandr and I'm 28 years old. I was born and live in the beautiful Ukrainian town of Olevsk, Zhytomyr region. I'm married and have a wonderful child.

I grew up in a traditional Ukrainian family. My parents kept a small home farm with cows, pigs and rabbits. I was a real helping hand for them. I helped to carry for animals, cut grass, mixed food for cows and pigs and cleaned the barns. In 1998 I went to school and graduated in 2009. I was good at studying. My favorite subjects were Biology, History and English.

Right after school I went to look for my first job. I had a dream to get an education, so I needed to earn some money. I found a job on a construction. Through this experience, I have gained the skills of construction work.

After several years of working in my hometown, I decided to start developing in the field of agriculture. I realized that the best way to get the skills you need is to start working on a modern and well-found farm.

From February 2014 to July 2015 I worked on a pig breeding farm in Denmark. The farm was maintained with all the necessary equipment and I quickly became part of the team. During this work period I got all necessary skills in feeding and watering pigs, castration, artificial insemination, vaccinating, monitoring pig health, weighing pigs, cleaning and washing the boxes. I also fulfilled field works on a tractor: harrowing, fertilizing, plowing, seeding and cultivating. During the work on the farm I got skills in welding, too.

When I came back to Ukraine, I decided to continue working in the pig breeding sector. From August 2015 to March 2017 I worked at a Ukrainian pig breeding farm. My everyday duties included mixing food for animals, feeding and watering, cleaning and disinfection of stables. I also was responsible for operating farm machinery and performing field works such as fertilizing, disking, plowing and harrowing. In the case of breakage, I repaired the farm machinery.

My next work experience was connected with plant growing. I decided to get some skills in vegetable growing because I think that when you want to work with animals, you also need to have some knowledge in plant care. I worked for one season in Norway in 2017. There I did planting and transplanting of seedlings, taking care of plants, collecting and packing potatoes, carrots, parsnip and cabbage. I also prepared vegetables for sale. In Norway, I mastered my skills in managing tractor.

As for my education, I have a diploma of a vet of Professional Agrarian Lyceum. I entered the lyceum in November 2017, and graduated in January 2020.

I enjoy a healthy lifestyle. I also like fast cars and travels. My main goal in life is to develop my skills in animal husbandry.

I have driver licences on a car and a tractor, and I can handle these kinds of transport perfectly.

My native language is Ukrainian. I also can speak English well.

Currently I want to continue to work in the pig breeding sector. Not so long ago I've got the diploma of vet. Besides, I have relevant work experience. That is why I'm looking for a permanent workplace on a pig farm in Canada. I would like to relate my life to farming in this country.

Regards,

Oleksandr
