Driver licence	Car
Equipment experience	
6.Hobbies and interests	Cooking, watching movies, playing volleyball
7.Job start date	As soon as possible

Autobiography

My name is Maryna Ferenets. I am 28 years old. I was born on the 13th of February, 1993 in a small village in Vinnytsia region. My family consists of 6 people. My mother Tetiana is a housewife. My father Petro works as a security guard at the school. I also have a brother. He is married and has a little daughter. I am divorced and don't have children. My height is 167 cm, my weight is 65 kg.

My family and I have always lived in the village. My parents always have had a household with some pigs, chickens and a cow. We kept them or ourselves and also we sold small piglets at the market. My mom taught me how to take care about our animals: to feed, water, brush and clean after them. So I helped my parents the childhood, spent a lot of time with our animals. It formed my love to the animals and nature. It became my hobby and my profession later.

After finishing my school study I stayed at home for some years because there was a lot of work to do at our household. Then I decided to try myself in another sphere. I went to a big city and found a job in the supermarket. Then I worked at the factory. At that time I realized that living in a big noisy city is not mine. I love country lifestyle and working with animals.

I decided to get an agrarian education and became a student. From 2015 to 2018 I studied in the Vocational Agrarian Lyceum on the faculty of veterinary and stockbreeding. My profession is a vet. During my studies at the lyceum I have had different kinds of training practice at the training livestock farms. My responsibilities mostly were connected with taking care of pigs and cows.

After graduating I found the job on the Ukrainian pig-breeding farm "Agroprod". I worked there to February 2020. I had such duties as vaccination, treatment of sick pigs with medicines, feeding pigs, piglets, doing castrations, farrowing help, looking after newborns, cleaning and washing stables.

I was lucky to find a job abroad at a modern farm. S from April 2020 to April 2021 I worked on a pig-breeding farm in Denmark. There I was engaged in different processes: taking care of sows and piglets at 7 kg, caring of the newborn piglets, giving medicine, making vaccination, doing the insemination, doing castrations to piglets.

I speak English and keep learning it still. Also I speak Russian. My mother tongue is Ukrainian. I have a driving license and can drive a car. In my free time I like to cook, watch movies in English and playing volleyball.

Now I am looking for a job in Canada as a skilled worker. I have a proper education and experience which I would like to apply on one of the pig-breeding farms. I would be thankful for such an opportunity.

Regards,

Maryna
