| <b>8.Job start date</b>                               | As soon as possible  |

# Autobiography

---

My name is Ivan. I am 34 now . I have a small family. My father Mykolai works as a musicianleader at philharmonic. I am married. My wife's name is Ruslana. I have a son. His name is Nikita, he is one year old. I grew up mostly with my grandfather and grandmother, they had a private farm near Poltava, so I know a lot about pigs and cows.

I studied at secondary school. After school I went to the Army and served for many years. I worked at a radiocommunicator in the millitary unit.

Later I dedcided to change something in my life. I found a job at a pig-breeding farm in Ukraine. I worked from June 2010 till May 2012. There I was doing such work as

feeding, cleaning, washing,  
castraton, insemination.

But as I didn't have education my chef sent me to study. I entered Agrarian lyceum, the faculty of veterinary. I was studying from 2012 till 2014.

From October 2014 until July 2015 – had practice on Danish pig farm. (Havvejen 54. Haderslev 6100) 700 sows with full circle. I worked in insemination pens and also helped with some routines in farrowing pens. I did such work as

feeding, cleaning and washing boxes,  
insemination,  
vaccination sows,  
scanning of pregnancy,  
ferrowing assistance,  
castration,  
detection of sick animals,  
treatment,  
record keeping.

After coming back to Ukraine I continued working at the same farm where I worked before Denmark. I started working in September 2015 and am working here now.

I have good IT skills I am a competent computer user, can work with Agrosoft svin , Deutchman feeding system.

I passed IELTS and I can speak English well. Also speak Russian and Ukrainian.

I have a driving license, categories B and C. I have skills in biulding and welding.

As for my hobby I am fond of training in the gym, krossfit and swimming.

As I have good experience in breeding pigs I would like to go to Canada and to try myself in farming there. I know that h og production is a vital component of Canada's agricultural economy. That is why it is high developed and i think I will be able to learn new methods of breeding pigs in Canada.

Regards, Ivan.
