8.Job start date	As soon as possible

Autobiography

My name is Andriy. My father Petro and my mother Lidiia are retired people now. I also have one older brother.

From the very childhood I like to help my parents on a farm. They still have a piece of land and some animals like cows, pigs, hens and rabbits. So I used to work hard and long hours.

In 1997 I finished secondary school and entered The State University of Agriculture and Ecology of Ukraine on Mechanization of Farming Faculty.

At the university I had practice in farming business. I was working in a workshop as well as in a field and with livestock. It was a compulsory part of farmer's education. After graduation in 2002 I went to work at the pig farm to take care of sows and piglets, I also worked in the field.

From March 2003 till September 2004 I had practice in Denmark on a dairy-cattle farm. During that time I got much practical experience, such as

milking and feeding cows,

taking care of calves,

ploughing, cultivating the soil,

growing potato and maize.

From April 2005 till October 2005 I was working on a Swedish milk farm. There I improved my knowledge in running of the farm. At that time I also did ploughing, cultivating, harvesting besides milking and feeding the cows. I got really good experience.

In April 2006 I went to the United States to have practice at the "Atlantic Nurseries Inc". It is plant wholesale company. I was happy I to have that opportunity to learn working with the plants. There I stayed till October 2007. Potting, watering, pruning the plants and mixing the soil for them- it was my everyday job. I visited other greenhouses with my host family. During my staying in the USA I travelled a lot, my English become better.

In 2008 I decided to gain one more education and entered Agrarian lyceum, the faculty of veterinary. I studied till 2010. After the graduation I look after my own household and waited for the job in Sweden.

In July 2011 I went to Sweden to work on a dairy farm I had a job before, by that time farmer had installed Lely Astronaut automatic milking robot which works 24 hours a day. I had to supervise it, make small repair and so on. I have worked in the field, made the electric fence, helped with the major repair in the cowshed and some construction job. Besides I attended Swedish language school for new comers. So I can speak Swedish a little bit. I stayed there until August 2014.

In June 2015 I started to work as a fitter at a butter plant. I was working for a year.

In August 2016 I found another job. I started to work as an operator of machine tools with software control at a company "KROMBERG & SHUBERT". There I worked almost for one year and last two months I was an engineer in a technical department.

Since June 2017 I have been engaged in householding and work for myself. I keep some cows and grow greens in a greenhouse.

I have a driving license. I have good skills in field work. I can do ploughing, cultivating, harvesting. Also I have experience in maintenance of farm machinery and building.

As for my hobbies I like to go into the nature, reading, traveling and sports activities like running, swimming and volleyball.

Now I am looking for job in the next country. I hope to enlarge my knowledge and practical skills in dairy farming while working in Canada.

Sincerely,

Andriy.
