7.Job start date	As soon as possible

Autobiography

My name is Artem. I am 25 years old. I am living in a small town. My town is small but so beautiful and it contains of many wonderful memories for me. I have not a big family. They are my wife and my little son. Right now my wife is not working because of our little boy. He is kind and smart and learns very fast. Especially when he wants to make some bad things like drawing on wallpapers or breaking his toys. But we love him too much.

My school life started in 1999. For my school years I was studying at 2 schools. Both of them where general. I can't tell something special about my school years. I thing everyone has the same memories about school years like learning different types of training lessons and making friends with a lot of people and first love and strolling lessons etc. But for everyone it is his special and personal memories.

In 2010 I finished my school study and I entered the University. I chose studying English language and Literature because I was fond of learning languages at school. I studied till 2014 and during my study I had a opportunity to improve my English in the USA.

In 2013 I was using a program named Work and Travel. I was at the USA for 3 months and was working as a lifeguard. It was unforgettable experience.

After the graduation in July 2014 I decided to try myself in the sphere of agriculture and found a job at a pig farm in Ukraine. It was a summer job at first but later I continue working at that place till June 2016. I started to work as a cleaner but I was good at learning and soon I had more responsible duties. I did

- feeding, fixing food,
- health checking,
- cleaning and washing of boxes,
- taking care of newborns,
- farrowing assistance,
- tail cutting, sorting and marking.

I enjoyed my job so much and decided to connect my life with farming and to get an agrarian education. In 2016 I entered Agrarian Lyceum, the faculty of veterinary. I studied for 2 years.

From March 2017 till August 2017 I worked in Poland at the plant because I need some money for my study and life.

After the graduation from the lyceum I was offered to go abroad and work at a pig-breeding farm. From June 2018 till June 2019 I was working at a pig farm in Denmark. I worked with pigs from 20 till 120 kg for 10 months. Also I worked at the maternity department for 1 month and at the insemination department for 1 month too. I worked with Landrace, Yorkshire and Duroc breeds My duties were

- feeding pigs and piglets,
- giving vitamins, minerals and medicines,
- farrowing assistance,
- vaccination with zinc,
- tail and cord cutting, teeth polishing,
- detecting of sick piglets,
- moving and sorting piglets,
- marking of piglets,
- castration (just tried to do)
- record-keeping,
- making nurse sows,

stimulation of heat,
moving sows to the insemination department,
insemination,
cleaning and washing rooms,
maintenance and repairs of equipment,
feeding system control,
temperature control,
weighting and moving piglets to the car, when they are sold;
sales control.

I have good English. Also I speak Ukrainian and Russian and understand a little bit of Polish. As for my sport hobbies I like volley-ball and table tennis.

I have a driving license and can drive different types of machines.

Now I have a dream. It is to go to Canada and get experience at a pig- breeding farm. It will be a great experience for me to evolve myself. I think that the experience which I can get abroad will help me at my future life. I want to collect the experience of Canadian specialists and to learn new methods of running a pig farm.

Regards,

Artem.
